Saurav Mishra

Full-Stack Developer

sauravkumar12002@gmail.com | +91 7667606668 | linkedin.com/in/sauravmishra04 | github.com/sauravmishra7667

Greater Noida, India

PROFILE

Full-stack developer and Computer Science (AIML) undergraduate skilled in the MERN stack (MongoDB, Express, React, Node.js), with a strong grasp of JavaScript, TypeScript, Java, and Python. Experienced in building RESTful APIs, authentication systems, and real-time web applications end to end. Recently completed industry job simulations covering a GenAI chatbot, REST services, and React front-end development.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python
Frameworks/Libraries: React, Node.js, Express
Databases: MongoDB, PostgreSQL, Firebase
GenAI: Prompt Engineering, LLM API Integration, AI Chatbot Development
Tools: VS Code, IntelliJ IDEA, Antigravity, Git, GitHub

PROJECTS

DocMind — RAG-Based Document Q&A Assistant rag-app

React · Node.js · Express · MongoDB · LangChain · Pinecone · Gemini API

- Built a retrieval-augmented generation (RAG) app that answers user questions from their own uploaded PDFs
- Split documents into overlapping chunks, generated embeddings, and stored them in a vector database
- Retrieved the most relevant chunks for each query and passed them to the LLM as grounding context
- Showed source citations with every answer so users can trace responses back to the original page
- Streamed LLM responses token by token to the React client for a faster, chat-like experience
- Kept per-user document collections and chat history in MongoDB behind JWT-authenticated routes

Project Management Tool — Task & Team Tracker project-management-tool

MongoDB · Express · React · Node.js

- Developed a task and project tracking tool with project creation and task assignment
- Built features for tracking progress across team boards
- Structured backend APIs and database schema to manage users, projects, and tasks
- Added role-based access so project owners manage members while members update only their own tasks
- Supported due dates, priority levels, and status filters to make large boards easier to scan
- Kept board state in sync on the client so task updates show without a full page reload

AI Smart Bazaar — AI-Powered E-Commerce Platform ai-smart-bazaar

MongoDB · Express · React · Node.js · Gemini API

- Built a full-stack marketplace where sellers list products and buyers browse, search, and place orders
- Added an AI shopping assistant that answers product questions and suggests items from plain-language queries
- Implemented personalized recommendations based on browsing history, cart activity, and past orders
- Built a seller dashboard for inventory, pricing, and orders, with AI-generated product descriptions
- Developed cart, checkout, and order tracking flows with payment gateway integration
- Added search filters for category, price, and ratings, with JWT auth and separate buyer and seller roles

EDUCATION

Bachelor of Technology in Computer Science and Engineering (AIML) — Greater Noida, UP
Dr. APJ Abdul Kalam Technical University — 2023 – 2027

- CGPA: 7.21 / 10

CERTIFICATIONS

Software Engineering Job Simulation — HPE — 23 September 2026
Forage · Built a RESTful web service with data upload and unit tests — Code: 6ab2da5627a1fce094fc499f

Front-End Software Engineering Job Simulation — Skyscanner — 23 September 2026
Forage · Built a React web app using the Backpack design system — Code: 6ab39a106e7859ae7e43b40a

GenAI Job Simulation — BCG X — 22 September 2026
Forage · Data extraction, analysis, and an AI-powered financial chatbot — Code: 6ab2cec6b557d34fb9c7c294

Trust and Security with Google Cloud — 10 July 2026
